

IN THE SPECIFICATION:

Please add the following paragraphs after the paragraph that starts with "Fig. 5 is a schematic plan view" on page 6 of the filed application:

Fig. 6 is a cross-section of an example of the device;

Fig. 7 is a cross-section of an example of the device.

Please amend the paragraph on page 6 and page 7 of the filed application as follows:

A second example is shown in Fig 2. In this case, the device is built around a central rod 4 on which are threaded three failure elements 5 of expanded polystyrene, and a resilient indicator element 6. The failure elements 5 and resilient indicator element 6 are held in place by a pair of starlock washers 7. The resilient indicator element 6 comprises a sleeve 8 surrounding a core 9. The sleeve 8 and core 9 are biased away from one another by compression spring 10. When any one of the failure elements 5 fails in the presence of a chemical contaminant, the compression of spring 10 forces the sleeve 8 and core 9 axially away from one another, so that the outer surface of the core 9 is uncovered providing a visual indication that failure has occurred. Other examples of the device are shown in Fig. 6 and Fig. 7.
